

DIN HV Back-up Fuses for Transformers

Mersen HV fuse-links have been used for reliable protection in high-voltage switchgear and controlgear and high-voltage systems for decades.

Limiter ®-PD HV fuses are back-up fuses as defined in the standard: IEC 60282-1 and VDE 0670 T402 and dedicated to protect transformers against the thermal and dynamic effects of short-circuit currents.

The VDE 0670 T402 defines fuses between 6.3A and 160A, for other ratings, thanks to consult Limitor ®-P HV fuses range.

To guarantee high quality, Mersen uses the best materials: fuse-elements are in pure silver, caps are in copper coated with silver and bodies are in ceramic.
